

## **Quality, environmental and occupational health and safety policy**

- Compliance with all legal norms and regulations, national and international, that relate to the overall operation of the organization
- Respect and work in accordance with all requirements of the quality, environmental and occupational health and safety standards: ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018
- Production of machined parts and services of the highest quality that meet and exceed the expectations of buyers
- Increasing customer satisfaction through effective application of the quality, environmental and occupational health and safety standards
- Maintain cooperation and efficient relationships with all interested parties
- To provide economic benefits to all interested parties as well as utilizing all resources of the organization through continual improvement of processes
- Reduction of scrap and costs in all processes of the organization
- Continuous training of personnel for successful management of high technologies
- Efficient and rational use of energy in order to preserve natural resources
- Continuous reduction of negative consequences from the production of machined parts on the environment
- Implementing all possible measures to ensure occupational health and safety at work
- Continuous improvement and solving problems of the systems and processes of the organization by identifying the risks and opportunities that affect the quality of services and products
- Continuous fulfillment of the organization's annual targets and achievement of the set strategic goals
- Continuous improvement of the work through effective programs for corrective and preventive actions which are focused on eliminating the causes and potential causes of non-conforming products
- Constant improvement of process performance through ongoing maintenance, monitoring and development of the quality management system, environmental protection, health protection and safety at work.
- The policy is available to everyone working in the organization and to all interested parties.
- We are guided by the motive to be the main driver of development in the environment in which we operate.
